DETAILED ACTION

1. The amendment filed January 30, 2007 is entered and claims 1-13 are pending.

Allowable Subject Matter

2. Claims 1 to 13 are allowed.
3. The following is an examiner's statement of reasons for allowance: the claimed invention is directed to an active matrix light emitting display device.

Independent claim 1 identifies a uniquely distinct feature "wherein the active drive type light emitting display device is constructed in such a way that a plurality of measuring pixels each of which at least comprising a measuring element and a drive TFT that allows a drive current to flow to the measuring element are further arranged in the light emitting display device so that a forward voltage of the measuring element constructing the measuring pixel can be picked up from a power supply line of the measuring pixel".

Independent claim 9 identifies a uniquely distinct feature "wherein the drive control method for the active drive type light emitting display device executes the step of driving the measuring element constructing the measuring pixel, the step of obtaining a forward voltage of the measuring element in from a power supply line of the measuring pixel, and the step of controlling a drive voltage applied to the light emitting display pixel based on the forward voltage".

The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. Tim Simon (US Patent No. 6,943,759).

The closest art, Tim Simon as discussed above, either singularly or in combination, fails to anticipate or render obvious the above limitations obvious.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
